Contact: albanianfest@gmail.com

1. Cookies and browser storage

Cookies are small pieces of data stored in the browser. The website also uses sessionStorage, temporary storage for the tab. The tools described here support the form and submission confirmation.

2. Form fields

sessionStorage, using the key albanianfest_draft, temporarily keeps the entered fields so you can return from the documents without entering them again. Consent is neither stored nor automatically selected. The copy of the fields is deleted after a successful submission.

Duration depends on the tab session and browser behaviour. Closing the tab normally ends the session; restore functions may preserve it. You can remove it by clearing the website data in browser settings.

3. Submission receipt

The technical cookie albanianfest_receipt is set by the server after storage is confirmed and grants access to the thank-you page. It lasts at most one hour, is HttpOnly and SameSite=Lax, and does not contain form contact details. On HTTPS connections it uses the Secure flag.

Without a valid receipt, the thank-you page returns to the form. This cookie is not used for advertising or behavioural analysis.

4. Tracking and external services

The website does not integrate advertising pixels, analytics tools or embedded social videos. Fonts are hosted with the website. The animated Three.js background is a visual feature and not a tracking tool.

The text invitation to keep following the TikTok profile where you discovered the project does not embed TikTok content.

5. Consent

Technologies strictly necessary for the requested functions do not require the consent applicable to non-essential tracking. No cookie consent banner is displayed for the functions described here.

The form checkbox concerns data processing for AlbanianFest. It is not cookie consent. If non-essential technologies are added, the information will be updated and the choices required by law will be requested before activation.

6. Browser settings

You can clear website data or block cookies in your browser privacy settings. Blocking technical technologies may prevent field recovery or access to submission confirmation. Consult your browser support for current instructions.

The language is specified in the page address. The selector does not add cookies or persistent storage for language preference.

7. Contact

For information about data processing, see the AlbanianFest Privacy Policy on the same Legal documents page. You may contact us to request deletion or exercise your rights. The date at the beginning identifies the latest update.
